Hello,

I was wondering if it is possibile to let appear on the left side of this marvelous ctrl a sort of column that indicates the index of the column (from 1 to Number_of_Row) in some nice look as that of the header. Of course I can dedicate the first column of the ctrl for this purpose, but I would like to know if this capability is already present.

Luigi

No it is not possible, but I thought about that..
Now you can manually set proper values in first column and make it fixed (SetFixedCols(1))

PS: It's not so marvelous I hope it will be in future (when grouping and tree will be added)
