Subject: Snapshot 20060116 released
Posted by unodgs on Mon, 16 Jan 2006 18:34:15 GMT

Added:
  - Package organizer: Supports condition for "uses"
  - Package organizer: "Cancel" button.

Modified:
  - Package organizer: Completely redesigned and reimplemented

Fixed:
  - ToolBar: Now understands multiple hotkeys correctly.
  - OleDB: Now compiles in MSC8.0

p.s.:

* Do not forget to supply "Size optimization flags" to your build method, otherwise your code will likely be unoptimized

* Adding new features to build process means that (after app. 2 years) format of .upp files is upgraded. In other words, recompile TheIDE now to be able to compile next snapshots (when we will start using new features).
