String::

```
bool StartsWith(const T *s, int len) const;
bool StartsWith(const T *s) const      { return StartsWith(s, strlen(s)); }
bool StartsWith(const S& s) const      { return StartsWith(s, s.GetLength()); }

bool EndsWith(const T *s, int len) const;
bool EndsWith(const T *s) const        { return EndsWith(s, strlen(s)); }
bool EndsWith(const S& s) const        { return EndsWith(s, s.GetLength()); }
```

(To Sandor Hojtsy: Sorry for delay...
