Hello,

with the last release the CalendarCtrl and GridCtrl are part of the official distribution. Perhaps it is better to create a new forum dedicated to the gridctrl or add "GridCtrl" to that of the arrayctrl. Moreover the CalendarCtrl (and maybe even RegEx) should be removed by the group forum "Under Devolopment" and shifted toward the "Programming Existing Classes". This is to give the correct view to the new visitors.

Luigi

done.

thank you Luigi,

Bas
