I have layouted a window and put some controls on it.

I set the window sizeable, and I found that, I can't size the windows smaller than I layouted.

I can imaging the reason might be that the program what to maintain the layout of the program, but you know, sometimes people just have lots of strange require ^^"

Does there are anyway I can get rid of the minimal size limitation of window layouted?

Thanks a lot ^_____^
