Hello,

my app has a gridctrl with a fixed number of rows, say 10. So I need to disable the "past" that add rows further this limit.

If this cannot be done how to disable the whole "past" method?

Luigi

Such need seem to be reasonable. I will add a proper switch before a new dev.

Unfortunately it can't be disabled right now - I will add it too, just forgot to do it in 701-dev1.

Ok. Both options are implemented and in uvs.

Thank you very much Daniel. I'll wait the next dev.

Can you remind me the magic words of the new methods?

Luigi

I've downloaded the 701-beta and seems OK.

In this release is it possible enable/disable the paste?

... and what about the method that performs a past without overcome the last row? (I was unable to find such a method)

Thanks a lot,

Luigi

Disable:

`grid.Clipboard(false)`

Paste without overcome:

`grid.PasteFixed()`

Disabling paste as new rows/inserted rows

`grid.ExtraPaste(false)`

PS: This should be mentioned in changelog.txt (always see there )

PS2: I'm not sure about name PasteFixed if it is correct, if you have better idea please tell me.

It's OK.

Thanks

Luigi
