Hi. I'm using Ubuntu 6.10 and i installed the last version of Upp. I tried to use the file .deb but an error occurred during the installation.

Then i tried to install Upp from the sources and everything ran well but when i start Upp appear the version that i had previously. I installed the last version of Upp without uninstalling the previous one that i had on pc.
What i do now?
Sorry about the noob question and my poor english

What did you do to install the files from souces?

did you do the following?
$ make
$ sudo make install

Here is the error when i trie to install Upp with the file .deb

Quote:(Reading database ... 126902 files and directories currently installed.)

Unpacking upp (from .../upp_2007.1-beta3_i386.deb (--install):
trying to overwrite '/usr/bin/theide', which is also in package ultimate++
dpkg-deb: subprocess paste killed by signal (broken pipe)

thank you

Hi,

please try
apt-get remove ultimate++
dpkg -i upp_2007.1-beta3_i386.deb

Bas
