Hello,

Scribble1, Scribble2, and Scribble3 will not compile with errors:

<uggg... cut and paste to clipboard does not work on my Linux box...>

looks something like:

```
Scribble3/Scribble.lay:4: error 'Label" does not name a type
...
```

Scribble (no extension number) does compile and run, but offsets the mouse pointer if you shrink the window so that scrollbars pop up.

BTW, I am running beta3 on Gentoo-Linux (2.6.18-r6 kernel) gcc-4.1.1, xorg-x11-7.1

Maybe those examples haven't been updated since UPP was changed to use a "Upp" namespace.

Try adding "using namespace Upp;" (usually done just after all the #includes)

That did the trick for Scribble1 and Scribble2. Maybe the examples maintainer can update the Scribble1 and Scribble2 examples. Scribble3 still compiles with errors.

Thanks,

Thanks,

Strange, actually, Scribble1 - 3 were removed in favor of single Scribble example...

Mirek

Hmmm... I still find Scribble[123] in the source. I was not aware that they were deprecated.
