hello, I wanted to use an autocomplete box, does u++ has some kind of control like that? I looked at the docs and didn't find, but I may be wrong

thanks
marcel

No. You can make one. We will make one soon too if you don't (It is not that hard).

Hi All,

Just wondering did anyone ended up making a Autocomplete box? I am trying to use the WithDropChoice<EditString> but It does not automatically complete the typing from the dropchoice items. Should I go on extending the WithDropChoice Template to implement it or the feature already exist somewhere else?

Thanks & Regards
navi
