Subject: previous day's messages?

I would like to suggest a forum interface enhancement: previous/next day message links similar to the slashdot blog and similar forums.

Basically I skim through the messages via "todays messages" feature. Sometimes I miss a message because it was posted sometime in the middle of the night.

Just a thought...

I use the message navigator and search for the last 1.5 days, or 2 if I haven't been paying attention for a while, or 0.5 if I checked recently.

really? WoW! That was a fast implementation, you guys are fast as greased lightning and slicker than frogs fur

Yep, I had not known about that functionailty already was implemented. Thanks for the pointer!
