Subject: Richtext / Uword problems

Compiled Uword using 2007.1rc2.

Added the feature to get all fonts from windows by changing the source but don't think this is the problem.

Two problems occur when using Uword.

1. When pasting an image the subsequent text type changes from Arial to Times New Roman. (Well does not continue as pre image)

2. Cannot copy an image from the page and subsequenty paste it.  The previous paste image is used.

Any suggestions please.
