What has happened to EncodeQTF. I cannot find a reference to it in UPP source. Want to convert Rtf to Qtf and cannot use the example posted in Feb 2006.

How does one Encode QTF from RTF without it?

```
String   AsQTF(const RichText& doc, byte charset = CHARSET_UTF8,
           dword options = QTF_BODY|QTF_ALL_STYLES|QTF_CRLF);
```

e.g.:

```
SaveFile("myfile.qtf", AsQTF(ParseRTF(LoadFile("myfile.rtf"))));
```

That was what I was using.
The two routines inport /export RTF

I can export text in RTF and read again in WORD.
I can create text in WORD and read in the editor.
I can create Text and images in WORD and read in the editor.

If I export text and images I can read in WORD

Text and images I export in the editor I cannot read back.
Appears to be a blank file.

Any help would be welcome.

editor below is

RichEdit editor;

```
// EXPORT RTF

void Editor::SaveAs() {
 FileSel & fs = RTFFs();
 if(fs.ExecuteSaveAs()) {
 String filename = fs;
   if(SaveFile(filename,EncodeRTF(ParseQTF(editor.GetQTF()),CHA RSET_UTF8))){
   Exclamation("File " + filename + "was saved.");
   ClearModify();
   }
 }
}

//IMPORT RTF
void Editor::Load() {
 FileSel& fs = RTFFs();
 if(fs.ExecuteOpen()) {
 String filename = (String) fs;
  String fileb = LoadFile(filename);
  RichText& fbody = ParseRTF(fileb);
  String qbody = AsQTF(fbody);
  editor.SetQTF(qbody);
  editor.ClearModify();
 }
 else
  statusbar.Temporary("Loading Aborted.");
}
```

Have you checked actual .rtf file? Does it seem ok?

The file will load in WORD and formats correctly.

I will modify Uword with an imoport and export and see if the problem exists there.

Attached a modified version of Uword with import and export

of RTF.

Exhibits the same problem. When Exoprt RTF cannot read in again.

Thanks, fixed.

Quick patch:

RichText/ParseRTF.cpp 176

```
RichText RTFParser::Run()
{
 if(!PassGroup() || !PassCmd("rtf") || command_arg != 1 && !IsNull(command_arg))
  return output;
 while(Token() != T_EOF)
  ReadItem();
 Flush(false, 1);
 FlushTable(0);
 return output;
}
```

Thanks will incorporate change and test.

Any progress with an earlier problem with richtext I posted on 17th March.

When pasting an image in between text, the text font changes to Times New Roman rather than that before the image.

Also cannot copy an image within the page. The paste puts an earlier image in instead. Copy does not appear to ergister the image.

Thanks again for the good work and fast response.

When pasting an image in between text, the text font changes to Times New Roman rather than that before the image.

Sorry I forgot to respond... I was unable to reproduce the bug. On my rig, everything seems to be in order.

BTW, this is serrious error:

RichText& fbody = ParseRTF(fileb);

- you are taking a reference to temporary object, which is gone by ';'.

Corrected:

RichText fbody = ParseRTF(fileb);
