Hi, I'm trying to compile to PocketPC, using MSC 8 Pro, but without success.
Can somebody upload a working .bm file as an example, to be able to compile to MSC8ARM?

If you'd like I can upload project files for MSVC 8.
190 projects. Not everything is finished yet but still usable.

Thanks, but I want to use Ultimate++ IDE if it is possible.
I want to evaluate WinCE port, because we are starting a new project and it would be very good for us to use Ultimate++ in WinCE development.
So a TheIDE .bm file would be useful as a starting point.

I reply to myself with a solution

This is my .bm file usable with default setup of MS VisualStudio 2005 Pro.
