Hi,

how to sort the font face list? Using `Font::GetFaceName(q)`, where `q` is the incremental index, the list of face name look like as "random name".

I hope can get the list like: A., b., c., d., ..., Z...

Mauro Bottizzo.

Load it to the `Vector<String>` and sort it.

Of course, if you want to keep the index, you will need something better than `String`, like:

```
struct {  
    int fonti;  
    String name;  
};
```

or, alternatively, if what you want is to fill some `DropList` with fonts, you can use `GetSortOrder`.

Mirek
