Hi,

how do I set up an SqlArray for mouse selection?
Navigating with up/down cursor keys works by default, but no response to mouse-clicks
With plain ArrayCtrl, mouse selection works ok.

Guido

What exactly you mean by mouse selection?

Do you mean that SqlArray does not react to mouse clicks?

Mirek

Yes. I can navigate with the keyboard cursor up/down keys, but clicking on a particular row does nothing.

Yes. I can navigate with the keyboard cursor up/down keys, but clicking on a particular row does nothing.

Guido

Well, given that most of my users are using SqlArray each day, this sounds pretty unlikely... Have you checked with e.g. examples/SQLApp?

Ok, the SqlArray was derived as ParentCtrl, as of the StdApp template, that was causing the weird behaviour. With its bugs and quirks, it isn't so nice a starting point, as I thought - lot's of headaches lurking.

Guido
