Just thought I would mention you can not add a new icon from clipboard on OsX11. But that is probably something to do with the format that OsX uses for clipboard images. I just do my Icon work in Windows for now

But anyway, does anyone know of a good resource of icons? maybe someone wants to do some? The icons we have in our FTP program are terrible and it would be nice to add a little cosmetic touch.. as a programmer, whenever I touch something in the area of GUI, it always ends up looking a little sparse... like siberia or so.

Hi,

have you already had a look at tango.freedesktop.org/Tango_Desktop_Project or www.iconarchive.com?

There are also lots of free icons.

Matthias

Yeah been all over. The hardest icons to find were Connect and Disconnect. Oh well.

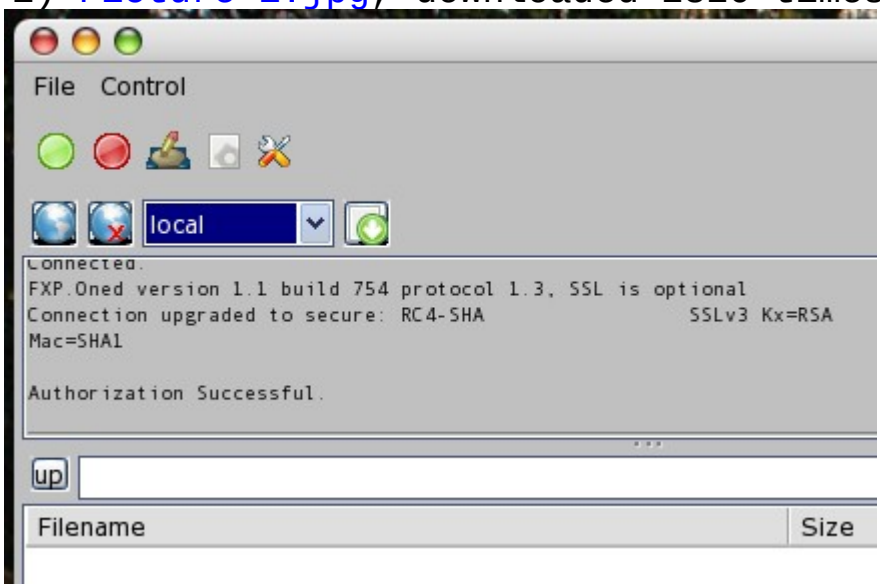

In the end, Gion By ertz from Gnome will do for now

Whats the deal that the icons in the toolbar have no borders, but the others do? Might be nicer with border, that doable?

Cheers

Hi,
I also look for code to add border to menubar and toolbar!!!!
Please help us

Thanks
