Hi,

The tooltips seem to be dead in 704.dev1. Any suggestions on what could be the problem?

Thanks,

Thanks!

A side-note - 704.1 is probably the most unstable release ever Too many things being added/changed now....

Thanks for the caution.

I'll be sticking to 2007.1 till 704 reaches close to RC.

Well, that is not how things work... and how they should work. There will now be series of dev releases, adding things. Usually, they are pretty stable, but right now we are in the middle of D&D

issues which makes it a little bit unstable - till next week or so.

Anyway, more people using "dev" for the real work the faster we get it stable.

BTW, just checked those tooltips, seems working to me.... (but is is possible it was some intermediate phase).

Mirek
