I have theide 2007.1 in Xubuntu Feisty, and there are strange results in keymappings. I thought it was a linux problem, since I had already had some trouble of this kind, but kde programs keys work, so the culprit must be upp .

I have an italian keyboard

Here I map some strange results:

```
Ctrl+1 -> Ctrl+1
Ctrl+2 -> Ctrl+2
Ctrl+3 -> Ctrl+[]
Ctrl+4 -> Ctrl+[]
Ctrl+5 -> Ctrl+[]
Ctrl+6 -> Ctrl+1005e
Ctrl+7 -> Ctrl+/
Ctrl+8 -> Ctrl+8
Ctrl+9 -> Ctrl+9
Ctrl+0 -> Ctrl+0
```

When pressing Control + Shift + x (x is a number bar 0,3,7) I get
Ctrl+Shift+1002x

```
Ctrl+Shift+0 -> Ctrl+Shift+[=]
Ctrl+Shift+3 -> this is not even recognised
Ctrl+Shift+7 -> Ctrl+Shift+[/]
```

I had already said something about this in the forum, but if this mess persists maybe would be better to not provide fixed keys and letting the user to set his own. I managed to render at least bookmark keys settable by user in the ide (it is a little verbose solution, but at least it works on my system too), so if you want I can send you a polished patch.

Ciao,
David
