Hello,

I was wondering if there was a way to preserve the watch variables used during debugging across multiple debugging sessions.

Thanks,

Dave

I'll second that. This is a must.

YES please!
I'm hitting this issue last 10 days while I'm doing lot of very small simple console apps.
But right now I can't look into it, nor do I know where to start?
Any pointers from anyone where to start looking?
Maybe I will try something next week or so.
