Subject: EditInt and context menu

Hello,

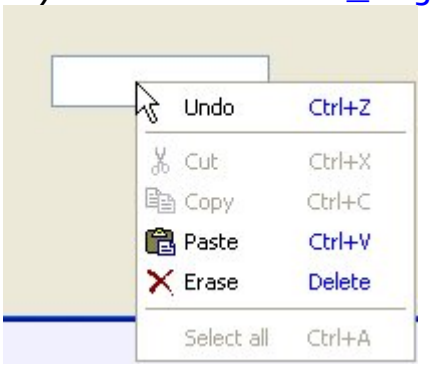

I would like to let appear a context menu (popup menu) each time the user press the right click inside an EditInt ctrl.
But my popup (the same found on the gui tutorial dealing with CallbackArgTarget) is overrided by the default behaviour

showing its own popup. So perhaps it is easier to override the existing control. I believed to found a WhenBar callback but it was absent.
Any idea in which direction to move?

Luigi

Override RightDown.

Mirek
