When I try to run theide on Windows 98, I get an error - "A required .DLL file, PSAPI.DLL was not found"

I found this thread with a similar problem:

http://www.ultimatepp.org/forum/index.php?t=msg&goto=181&&srch=PSAPI.DLL#msg_181

Is there a version that will run on Windows 98?

Thanks.

I tempted to say no

Anyway, you can get one by recompiling TheIDE with mingw. That way, MSC++ debugger does not get included and the problem disappears.
