I have studied UPP for three months, I find it is excellent. It is very easy and powerful. But when I try to use ctrs as member of Top window, it seems that the Internationalization does'nt work. My code is as follows:

```
class TransWithCtrlInTopWnd : public TopWindow {
public:
    MenuBar menu ;
    Button bt ; // a ctrl
    bool langIsChina ;

public :
    // menu handler
    void MainMenu(Bar &bar)
    {
        bar.Add(t_("Try It"), THISBACK(SubMenu)) ;
    }

    void SubMenu (Bar &bar) {
        bar.Add(t_("Menu1"), THISBACK(BlankFun) ) ;
        bar.Add(t_("Menu2"), THISBACK(BlankFun) ) ;
    }

    void BlankFun() {}

    // Button handler
    void ChangeLanguage()
    {
        // When push button, change language between english and chinese.

        langIsChina = (!langIsChina) ;

        if (langIsChina)
            SetLanguage( LNGC_('Z','H','C','N', CHARSET_UTF8) ) ;
        else
            SetLanguage(LNGC_('E','N','U','S', CHARSET_UTF8) ) ;

        menu.Set(THISBACK(MainMenu)) ; // Refresh menu
    }

public:
    typedef TransWithCtrlInTopWnd CLASSNAME;

    TransWithCtrlInTopWnd() {
        langIsChina = true ;
    }
};
```

```
AddFrame(menu) ;
menu.Set(THISBACK(MainMenu)) ;

(*this) << bt.LeftPos(5, 100).TopPos(20, 20) ;

bt.SetLabel(t_("Push Me")) ;
bt <<= THISBACK(ChangeLanguage) ;
}
};
```

And I attach my upp project file.

Hi, you need to add to the application the code responsible for handling of translation file:

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

#define TFILE <TransWithCtrlInTopWnd/my.t> // <----
#include <Core/t.h> // <----

class TransWithCtrlInTopWnd : public TopWindow {
...
}
```

PS: first click on the button changes lang to english, so you need to click twice to see chinese

Michal

Thanks your help. Yes, I must include the header files.
