Subject: incremental package duplication [FEATURE REQUEST]

let's say I have my package "test" and I want to save it and start to experiment with a new version of it: "test1". Can be that added to "Set main package" as "Duplicate" or to "File" - "SaveAs"? That could serve as custom templating system. As it is  now, I have to make a new dir, copy files, edit *.upp file...

Good idea. I will add that together with "Rename" and "Delete" (but for the moment, just to ToDo.... We are going to release 602 today or soon).

Mirek

P.S.: If you want, you can check my ToDo list in the root of uppsrc. Sorry for some czech entries
