Hello!
In debug mode before start debuging.
This message :
ASSERT FAILED: Assertion failed in \\\uppsrc\Core\String.cpp, line 204

and break debug.

Thanks!

Sorry, I almost replied before but I thought luzr might come in with something more useful.

The only thing I can think of without more info is that you are using a String somewhere as/in a global variable (so it gets initialized before GUI_APP_MAIN is run). Either you are doing something invalid with it or calling a function that relies on GUI_APP_MAIN having been called. Try looking for this.

I had this problem with Font on Linux and I couldn't start stepping through until the program entry-point (GUI_APP_MAIN) so it took me ages to find.

Hope that helps,
James
