Latest upp;

installed on: debian;

Problem:

selected 'New package'-option and want to use the templates

(.utp according to Help they should be available..)

but I cannot find them...

Is it an install-option I missed?

Can I download them from somewhere?

PS: I do not have the option in 'waxblood's message to copy from earlier version

(yet?!) - should I download it and do so?

No, it's not your fault, the templates are just missing from the package.

I don't understand what you mean. If you have problems downloading the attachment in my post http://www.ultimatepp.org/forum/index.php?t=msg&goto=9359&#msg_9359

just download last upp for windows (which has the templates -although some are for windows-only apps) and copy them to uppsrc

Ciao,
David

(oops)
got it this time round
Thanks
