Subject: Wrong behaviour when switching from text to graphical mode [BUG]

If I modify a layout in text mode making some error, when I press Ctrl+T Console displays this message

/UPP/uppdav/uppsrc/ide/DavidProve/prova.lay(2): missing 'END_LAYOUT'

Now if I correct the error and press Ctrl+T again, theIde doesn't switch to graphical mode anymore. The only way to restore graphical mode is to select another tab than select the .lay file again.

Ciao,
David
