Anyone can create this package?

Thanks

The mantainer of Linux packages (Bas, the FallingDutch) is on vacation, and anyway there are things that need to be fixed. At present you con only use 707-dev1 on Linux just to build other apps. Working with it is practically impossible due to bugs. Look at this thread

 http://www.ultimatepp.org/forum/index.php?t=msg&goto=105 54&#msg_10554

Ciao,
David
