To achive compatibility with wchar from msvc/Gdiplus (and enabled treat wchar_t as builtin) i had to change

```
#ifdef PLATFORM_WINCE
typedef WCHAR           wchar;
#else
typedef word            wchar;
#endif
```

TO

```
#ifdef COMPILER_MSC
typedef WCHAR           wchar;
#else
typedef word            wchar;
#endif
```
