hi there,

i think theide/ultimatepp has evolved into a stage where the "pr" should reflect the cool aspects of the project itself. i did two logo-overhauls... just sketches to show what i mean.

(also i think that pixeld logo icons are not very timely anymore considering that everyone nowadays is doing vector.

kind regards, abductee

ok, here the second pic (due to the 1pic/post limitations.)

/abductee.

p.s.: i'll see that i get my "list of proposed usability enhancements" together in the next time. i have some (what i think neat ideas. to be honest some of them are "inspired" by current solutions, but you'll see.

/abductee
