We have a requirement that EditInt and EditDouble are right-aligned for display purposes. This is not required during edit, only when the control is not being edited.

I like requests like this one: It was already contributed and included into uppsrc.

Not sure in fact in which version, but for at least 2 months, we have EditField::AlignRight (EditField is a base class for EditInt and EditDouble).

I'm out of sync with UPP Linux 2007.1 [message #10753]

Looking forward to your next major release for Linux.

There is nothing magic about getting more fresh U++ once you have running TheIDE and actual uppsrc. Just place uppsrc somewhere and create the assembly...
