Hello,

I like the standard look and I want to remove any link to GTK library (this prevent even troubbles in some my user that doesn't have such library) in my application.
How/Where to tune the flag for this task?

Thanks,
Luigi

Hi Luigi,

flagNOGTK will do the trick

Bas

Bas

Hi Bas,

only today I could try the suggestion but without success.
I added to my package:
WHEN: GCC; COMPILER OPTION: -DflagNOGTK
and the gtk stuff was still there. Maybe I must use the flag in some other places or way?

Thanks,
Luigi

Go to Project->Main Package Configuration. Add a line with GUI .NOGTK flags. Press OK. Then select the newly created line in the upper-left DropList in theIde. Compile and be happy.

David

David

Ciao David,

I tried and, I do not why and how, it worked!

Thanks,
Luigi
