Changelog since 708-dev1

SqlExp operator | now produces correct output for PostgreSQL  
fixed compiling SQL\_PostgreSql reference (Bas)  
optimized painting when there is a lot of out of screen widgets  
TabCtrl now supports Insert and Remove of tabs  
FileSel is now using icons from windows  
multidisplay support (in Windows)  
LOG improvements More here: <http://www.ultimatepp.org/forum/index.php?t=msg&th=2670&start=0>  
fixed ScrollBar::MinThumb(int sz) - there was not return value  
many DropGrid improvements (but still no documentation)  
fixed couple of bugs of GridCtrl (see changelog.txt)

And another one:

In file included from C:/upp/out/CtrlLib/MINGW.Debug\_full.Gui/\$blitz.cpp:207:  
C:\upp\uppsrc\CtrlLib\Win32.cpp: In function `UINT\_PTR Upp::sCenterHook(HWND \_\_\*, UINT, WPARAM, LPARAM)':  
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: `MONITOR\_DEFAULTTONEAREST' undeclared (first use this function)  
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: (Each undeclared identifier is reported only once for each function it appears in.)  
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: `MonitorFromWindow' undeclared (first use this function)

I used the same code which was compiling well on dev1, now using dev2 on Vista it reports this error.

Hmm...

I got another error on vista:

```
C:\upp\uppsrc\RichText\ParseRTF.cpp: In member function `Upp::String
Upp::RTFParser::ReadBinHex(char&) const':
C:\upp\uppsrc\RichText\ParseRTF.cpp:902: warning: converting of negative value `-0x000000001'
to `unsigned int'
```

michael wrote on Sun, 26 August 2007 05:53And another one:

```
In file included from C:/upp/out/CtrlLib/MINGW.Debug_full.Gui$blitz.cpp:207:
C:\upp\uppsrc\CtrlLib\Win32.cpp: In function `UINT_PTR Upp::sCenterHook(HWND __*, UINT,
WPARAM, LPARAM)':
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: `MONITOR_DEFAULTTONEAREST' undeclared (first
use this function)
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: (Each undeclared identifier is reported only once for
each function it appears in.)
C:\upp\uppsrc\CtrlLib\Win32.cpp:81: error: `MonitorFromWindow' undeclared (first use this
function)
```

I used the same code which was compiling well on dev1, now using dev2 on Vista it reports this error.

Oops, multidisplay support backfires...

Mirek

X11 bug:  
Pasting unicode text with the primary selection is broken.

Guido

X11 bug:  
Pasting unicode text with the primary selection is broken.

Guido

Broken? Like that it worked before and not anymore? (Because there was no work done there AFAIK...).

Ctrl+V pastes work?

Ctrl+V pastes work?

Yes, clipboard works as normal.

But the primary selection doesn't transfer non-ASCII characters properly. Somewhere the wrong encoding must be used.  
Previous dev didn't compile due to a missing or misnamed file. Wasn't able to try the primary selection support until now.
