   Hi there, I've just installed you'r U++ package, and I can't compile anything. Actually it compiles, but when the linking comes along.. I get a :: /mingw/lib/crt2.o:crtl.c :undefined reference to `__cpu_features_init`

Hope you can give some assistance.

I don't know what TheIDE uses as default... I had MinGW/bin in my PATH variable on XP .. but I removed it and it still gives the error. I don't know if U++ IDE uses MinGW's bin folder or the one from within it's installation folder .

Should I override the files from my MinGW/bin installation folder with the ones from UPP/mingw/bin ?

I replaced the files in my original MinGW installation with the ones from within U++ and everything works now.
