That's good news. Where can I download it?

Yup, I would love to get my hands on a debian package including latest fixes. As the SVN is only accessible to a select few for good (bandwidth?) reason, when can the rest of us expect to be able to play please?

Nick

Nick

Well, I am afraid we will have to elect a new linux maintainer...

Any volunteers?

Mirek

I guess you'd need to update SVN daily. Mantaining .deb, .rpm, .allotherstuffs il quite time consuming.

BTW, usually linux users can to it well with svn.

If you want, I could keep svn up to date.

Ciao

Max

Sorry for the delayed answer, I had thieves in my office.... I hope they'll spend all they've earned in hospital costs

If you like, I can start updating svn daily on next 2-3 days... I'd need the write access for that.
BTW, do you think to include my patches for DHCtrl in your tree ? If not, I have to keep 2 different trees here; that's not a big problem, ever.

Ciao

Max

That's great Max,

Now so far as I am aware only certain select persons have access to the SVN so how would someone like me get hold of a working Linux version please?

Nick
