I have a TopWindow which is both minimized and hidden. I can display it this way:

```
void showMainWindow()
```

```
{  
    Overlap();  
    Show();  
    SetForeground();
```

```
}But this other order do not work: void showMainWindow()
```

```
{  
    Show();  
    Overlap();  
    SetForeground();
```

```
}The result is that the window is displayed, but viewport area is not painted, only the title bar and frame. Is this a bug?
```
