Hi Everybody,

Attached is a patch to enable Visual C++ 2008 (MSC9/MSC9X64/MSC9ARM) build support. I have not added the MSC9 support into AutoSetup yet.

Thanks,

Hm, does it *require* NOWIN98 flag?

Mirek

Will support for visual studio express 2008 be in the next dev version please?

(not sure what to do with the patch - I like the automagic setup option)

EDIT: I have no idea what to do with the patch. I also don't seem to be able to download visual express 2005 anymore. If anyone could add a howto on getting visual studio express 2008 working with UPP, that would be very useful

Nick

could we include this in one of the next dev-releases?

greetings, Tom I am also really looking forward for VC9 support .

You don't need new version of ide to use vc9. Just replace your paths in MSC80 builder to point to vc9

Mirek

The NOWIN98 flag is no longer supported under VC9 but is used in VC8 to keep executable sizes small. Also unless you develop legacy apps for Win9x, this flag is highly recommended.

This patch adds minor compatibility fixes for VC9 that remove deprecated options that are no longer supported.

Thanks,

Yes but how does one add it in the first place? Also, anyone coming to UPP fresh just now can only get the MINGW version (which doesn't work all that well) as its now no longer possible to get VC Express 2005.

Nick

In which regard doesn't MinGW work all that well?

It doesn't debug. Not on any machine that I have installed UPP on and not with any reference project.

Visual C++ 2008 Express is now available:
http://www.microsoft.com/express/vc/

Enjoy!,
