Hi, I'm trying to build upp 711 dev2, but I got the following error:

In file included from /home/kknd/Projetos/Upp/out/Core/GCC.Blitz.Gui.Shared.So/\$blitz.cpp:117:

Evil, evil asm!

I'm on Arch Linux, with GCC 4.2.2.

Also, to try out I just did a ugly change form %ebx to %eba, and the compiled IDE crashes when opening a project.

Any ideas?

Strange I compiled it today (on ArchLinux too) without any problem.
