hi,
i want to write a codeformat.usc by using astyle program and the Script is like:

```
macro "Code Format":"Code Format" Alt+F{
    filetype1 = "*.h ";
    filetype2 = "*.cpp ";

    cmd = "astyle --style=ansi ";

    cmd<<filetype1;
    .Execute(cmd);
}
```

i really want to put this file in common directory but it work not.
how can i get th path of the source path(source package)?

ex: astyle --style=ansi /home/abc/upp/package1/*.h

i've take a look ESC language but there is not any functions like what i want.
Any ideas
Thanks a lot
Tuan
