Subject: Horizontal scrolling for ArrayCtrl

Hi,
I'm programming some reporting application using Python/Ultimate++ (great combination, of course) and my ArrayCtrl has too many columns to fit in the window. Is there any simple way how to add horizontal scroll bar to ArrayCtrl or how to wrap ArrayCtrl to some other Ctrl that will do all the horizontal scrolling function for it? I can't find relevant informations neither in help nor in uppsrc. Thanks for your help.

Gabi

Add this:
array.HeaderObject().Absolute();
