Subject: Bug in GridCtrl's WhenLeftDouble?

I'm using 712-dev1 with MSC9 on Windows XP.

The tutorial Grid01 doesn't work for me. Whenever I "double-left-click" on a cell it goes into edit mode and does not display an info-box as expected.

OTOH replacing "WhenLeftDouble" with "WhenLeftClick" or "WhenEnter" works fine.

Werner

Ok. I checked this. There is no error. Grid01 is actually connected with GridCtrl tutorial and it reflects tutorial's last stage. I mean you have to comments Edit()'s...

grid.AddColumn("Name");//.Edit(name);
grid.AddColumn("Age");//.Edit(age);

.. to make WhenLeftDouble work as you expect. WhenLeftDouble is called only if double clicked cell is not binded to any edit control.

Sure! You are right. Works fine. I simply didn't read till the end of the tutorial. Apologies!.
