I have an arrayctrl named datagrid. I catch mouse-events on this arrayctrl like this:

datagrid.WhenLeftClick = THISBACK(LCLICK_datagrid);
How can i catch mouse-events on the arraycrtl-column-title (The Header)?

Found a solution:

datagrid.AddColumn("NAME").HeaderTab().WhenAction = THISBACK1(LCLICK_datagridHeader, 1);
But when i use this to sort an array how can i change the sort-order?

```
void MainWindow::LCLICK_datagridHeader(int column)
{
 datagrid.Sort(column);
}
```
