Hi. I have just installed Thelde on Ubuntu 7.10. The problem is that the templates are missing. When i try to make a new project, based on templates, there is no template. I'm using 2007.1 version of ide (installed from \*.deb pack found on sf.net). Are the templates missing in that version of ide on Linux or is it a local problem of mine? Should i use the new version(712-dev1)?

you have two options:

a) get missing upt files from here: [http://www.ultimatepp.org/forum/index.php?t=msg&goto=9359&#msg\\_9359](http://www.ultimatepp.org/forum/index.php?t=msg&goto=9359&#msg_9359)

or

b) you can just take them from svn, maybe along with the new upp source. At this point you can even compile the latest theide version.

Look at this thread:

[http://www.ultimatepp.org/forum/index.php?t=msg&goto=13179&#msg\\_13179](http://www.ultimatepp.org/forum/index.php?t=msg&goto=13179&#msg_13179)

Ciao,  
David
