Hi.
If i set the menu bar to left, right or bottom, it become black.

I too would like to be able to fix menu bars to the left, right or bottom of windows.

The fix is to change line 81 of MenuBar.cpp (MenuBar::Paint) from:
Quote:PaintBarArea(w, this, style->arealook);to:
Quote:PaintBarArea(w, this, style->arealook, (GetAlign() != BAR_TOP) ? GetScreenRect().bottom : INT_NULL);

I can see no downside to this, so would it be possible to commit the change please?

Applied. Anyway, the question is whether in those case, look should not default to something else,

like SColorFace. Windows nor Gtk themes are not designed for such use....

I would leave it as it is unless there are obvious problems. It's a rare use-case, looks fine on XP and there is always the options of setting the changing the style yourself.

Thanks,
James
