Hi,

I have quite a lot of tables where I do want people to be able to paste cell values and ranges of cell values but I do not want people to be able to change the size of the table.

I have tried

```
m_grid.Append(false).Inserting(false);
```

but this does not appear to work.

Hey Daniel, are you looking at fixing copy/paste TO excel?

Nick

Please specify the widget. GridCtrl or ArrayCtrl?

I have tried

```
m_grid.Append(false).Inserting(false);
```

Use `m_grid.FixedPaste()` - to disable adding rows to fit clipboard data. Is that what you need?

GridCtrl support pasting of text clipboard (OO and MS Office stores grid data both in text and internal format in the clipboard). It should work fine. What's wrong?

Sorry Mirek, yes I'm talking about GridCtrl.

Daniel, I tried the FixedPaste and it prevents appending but still allows inserting. What do Appending(false) and Inserting(false) do?

On the subject of copy and pasting to/from excel, I cannot paste to Excel from GridCtrl. Even when I setup like this

```
GridCtrl grid;
grid.Absolute().SearchHideRows(false).Searching(false);
grid.Editable(false)
.Clipboard(true)
.ExtraPaste(true)
.TabChangesRow(false)
.SelectRow(false)
.AutoHideHorzSb(false)
.MultiSelect(false)
.FullColResizing(false)
.Sorting(false)
.MultiSorting(false)
.EditMode(1)
.HSizePosZ(16, 16)
.VSizePosZ(60, 16);
```

Am I missing something or do I need to get the latest version from the SVN?

Nick

Daniel, I tried the FixedPaste and it prevents appending but still allows inserting. What do Appending(false) and Inserting(false) do?

Appending enables ability to add or to insert a row (available in popup menu and through keyboard shortcuts)

Try ExtraPaste(false) to turn off the "paste as.." menu. Is that what you need? I can also synchronize it with Appending switch if you want.

I like the ExtraPaste menu. I just want to be able to disable appending and inserting please

... so an extra paste which picked up the Appending and Inserting states would be great

Nick
