Compiling theide, I get :

TreeCtrl.cpp

Upp::TreeCtrl

member of

member of

CtrlLib: 1 file(s) built in (0:02.43), 2436 msecs / file, duration = 2450 msecs

More error follows in other files, all related to CtrlImg.

Ciao

Max

mhhhh... it seems that in file 'CtrlLib/Ctrl.iml' file are missing 2 images, 'treeminusgrey' and 'treeplusgrey'.... plus a bad new, opening Ctrl.iml with last *stable* ide wipes the file completely.... I guess there was some change of format in .iml files between releases.

BTW, I'll add the 2 missing images to Ctrl.iml (just grayed versions of treeplus and treeminus, I guess) and update svn.
Beware when compiling with older ide versions, *don't* open .iml files or (IMO) they'll be wiped out.

Ciao

Max
