Hello !

I'm lost, I'm trying get this to work, I read the examples and can see that they work but when I try this by myself it simply doesn't work.

I allways get a blank tab, no visible content on it.

I'm using upp 2008.1

I'm sending attached a small complete project with it.

Thanks to anyone that can help !

main.cpp

```
#include <CtrlLib/CtrlLib.h>

using namespace Upp;

#define LAYOUTFILE <TabsTest/tab.lay>
#include <CtrlCore/lay.h>

class DBEdit : public WithDBEdit<TopWindow> {
 typedef DBEdit CLASSNAME;
 WithTabMainData<ParentCtrl> tab1;
 WithTab2Layout<ParentCtrl> tab2;
public:
 DBEdit();
};

DBEdit::DBEdit()
{
 CtrlLayout(*this, "DB Edit");
 tabData.Add(tab1.SizePos(), t_("Main"));
 tabData.Add(tab2.SizePos(), t_("Prices"));
}

GUI_APP_MAIN
{
 DBEdit dbEdit;
 dbEdit.Run();
}
```

Thanks a lot, even when I don't know exactly why we should do that !

It's working !
