Hello !

I'm lost, I'm trying get this to work, I read the examples and can see that they work but when I try this by myself it simply doesn't work.

I allways get a blank tab, no visible content on it.

I'm using upp 2008.1

I'm sending attached a small complete project with it.

Thanks to anyone that can help !

main.cpp

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
#define LAYOUTFILE <TabsTest/tab.lay>
```

```
#include <CtrlCore/lay.h>
```

```
class DBEdit : public WithDBEdit<TopWindow> {
```

```
    typedef DBEdit CLASSNAME;
```

```
    WithTabMainData<ParentCtrl> tab1;
```

```
    WithTab2Layout<ParentCtrl> tab2;
```

```
public:
```

```
    DBEdit();
```

```
};
```

```
DBEdit::DBEdit()
```

```
{
```

```
    CtrlLayout(*this, "DB Edit");
```

```
    tabData.Add(tab1.SizePos(), t_("Main"));
```

```
    tabData.Add(tab2.SizePos(), t_("Prices"));
```

```
}
```

```
GUI_APP_MAIN
```

```
{
```

```
    DBEdit dbEdit;
```

```
    dbEdit.Run();
```

```
}
```

```
DBEdit::DBEdit()
{
    CtrlLayout(*this, "DB Edit");
    CtrlLayout(tab1);
    CtrlLayout(tab2);
    tabData.Add(tab1.SizePos(), t_("Main"));
    tabData.Add(tab2.SizePos(), t_("Prices"));
}
```

Thanks a lot, even when I don't know exactly why we should do that !

It's working !
