Hello !

I'm lost, I'm trying get this to work, I read the examples and can see that they work but when I try this by myself it simply doesn't work.

I allways get a blank tab, no visible content on it.

I'm using upp 2008.1

I'm sending attached a small complete project with it.

Thanks to anyone that can help !

main.cpp

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
#define LAYOUTFILE <TabsTest/tab.lay>
```

```
#include <CtrlCore/lay.h>
```

```
class DBEdit : public WithDBEdit<TopWindow> {  
    typedef DBEdit CLASSNAME;  
    WithTabMainData<ParentCtrl> tab1;  
    WithTab2Layout<ParentCtrl> tab2;  
public:  
    DBEdit();  
};
```

```
DBEdit::DBEdit()
```

```
{  
    CtrlLayout(*this, "DB Edit");  
    tabData.Add(tab1.SizePos(), t_("Main"));  
    tabData.Add(tab2.SizePos(), t_("Prices"));  
}
```

```
GUI_APP_MAIN
```

```
{  
    DBEdit dbEdit;  
    dbEdit.Run();  
}
```

Thanks a lot, even when I don't know exactly why we should do that !

It's working !
