I've got StaticText control, which is working as some kind of labelled status indicator (picture+text).

Picture is PNG-image from .iml file, with alpha-channel.

So I write following code, and this picture is drawn on black background:

Am I doing something wrong, or it's a bug?

```
File Attachments
```

1) Untitled-1.jpg, downloaded 987 times

"underdevelopment". Never counted with transparent Images yet.

Quick fix:

RichText/ParaPaint.cpp 141

Quote:
Image RichObjectImageMaker::Make() const
{
ImageDraw iw(sz):

ImageDraw iw(sz); iw.DrawRect(sz, White); object.Paint(iw, sz); return iw;

}

(It is not 100% correct, we should use current paper instead, but that fix is more difficult).

Mirek

Thanks, that helped!

Looking forward to "official" fixing this bug in future builds.
