I've got StaticText control, which is working as some kind of labelled status indicator (picture+text).

Picture is PNG-image from .iml file, with alpha-channel.

So I write following code, and this picture is drawn on black background:

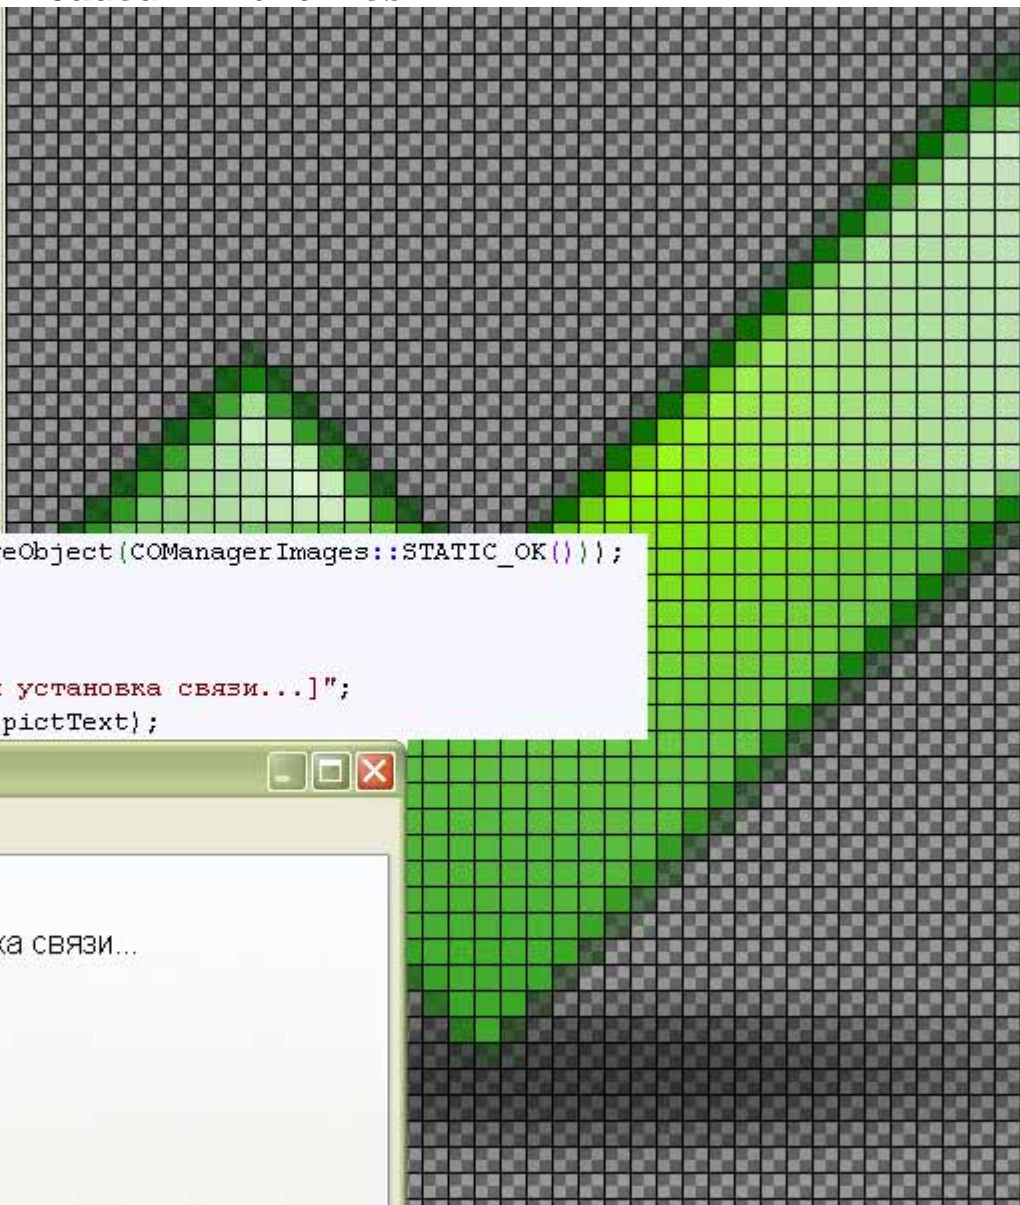

Am I doing something wrong, or it's a bug?

## File Attachments

---

1) [Untitled-1.jpg](#), downloaded 1120 times

STATIC_OK (48 x 48)	✓
BUTTON_OK (16 x 16)	✓
BUTTON_DELETE (16 x 16)	✗

```
RichObject pict(CreateImageObject(COManager Images::STATIC_OK()));  
String pictText;  
pictText << "\1[= ";  
pictText << AsQTF(pict);  
pictText << " Производится установка связи...";  
parentCtrl.header.SetText(pictText);
```

по COM-портам 0.3

Производится установка связи...

Am I doing something wrong, or it's a bug?

"underdevelopment". Never counted with transparent Images yet.

Quick fix:

RichText/ParaPaint.cpp 141

Quote:

```
Image RichObjectImageMaker::Make() const
```

```
{  
  ImageDraw iw(sz);  
  iw.DrawRect(sz, White);  
  object.Paint(iw, sz);  
  return iw;  
}
```

(It is not 100% correct, we should use current paper instead, but that fix is more difficult).

Mirek

Thanks, that helped!

Looking forward to "official" fixing this bug in future builds.
